

# Pretending COVID is over

DEFUNDING TOOLS TO FIGHT COVID

MAKING IT HARDER TO DETECT CASES

MAKING IT HARDER TO TRACK CASES

REMOVING MITIGATION MEASURES

UNDERREPORTING COVID INJURY & DEATH

NOT TALKING ABOUT COVID ANYMORE

DECIDING TO "RETURN TO NORMAL"

# doesn't make COVID over.

**There have been more COVID deaths in 2022 than in 2021.**

**Long COVID is real, and in kids too.**

**We can remain cautious by:**

...wearing high quality masks  
in indoor public spaces  
and in crowds.

...self-isolating until we  
test negative on a rapid  
test, when we are sick.

...staying up to date  
with COVID-19 vaccines  
and boosters.

**Protect others and yourself. Everyone's health is worth it.**
