

MORE MASKS,

LESS COVID

**THE MORE PEOPLE WEARING MASKS, THE LESS COVID THERE IS.
THE LESS COVID, THE FEWER SICK AND SERIOUSLY ILL PEOPLE.**

COVID-19 is much deadlier than the cold or flu.

Repeated COVID-19 infections can damage multiple organs and long-term health, even if you are vaccinated and an initial infection is milder.

Indoors and in crowds, high-quality masks are an important line of defence.

And the defence is even better when all of us do it.
